OptimPure 60 Tankless Water Purifier

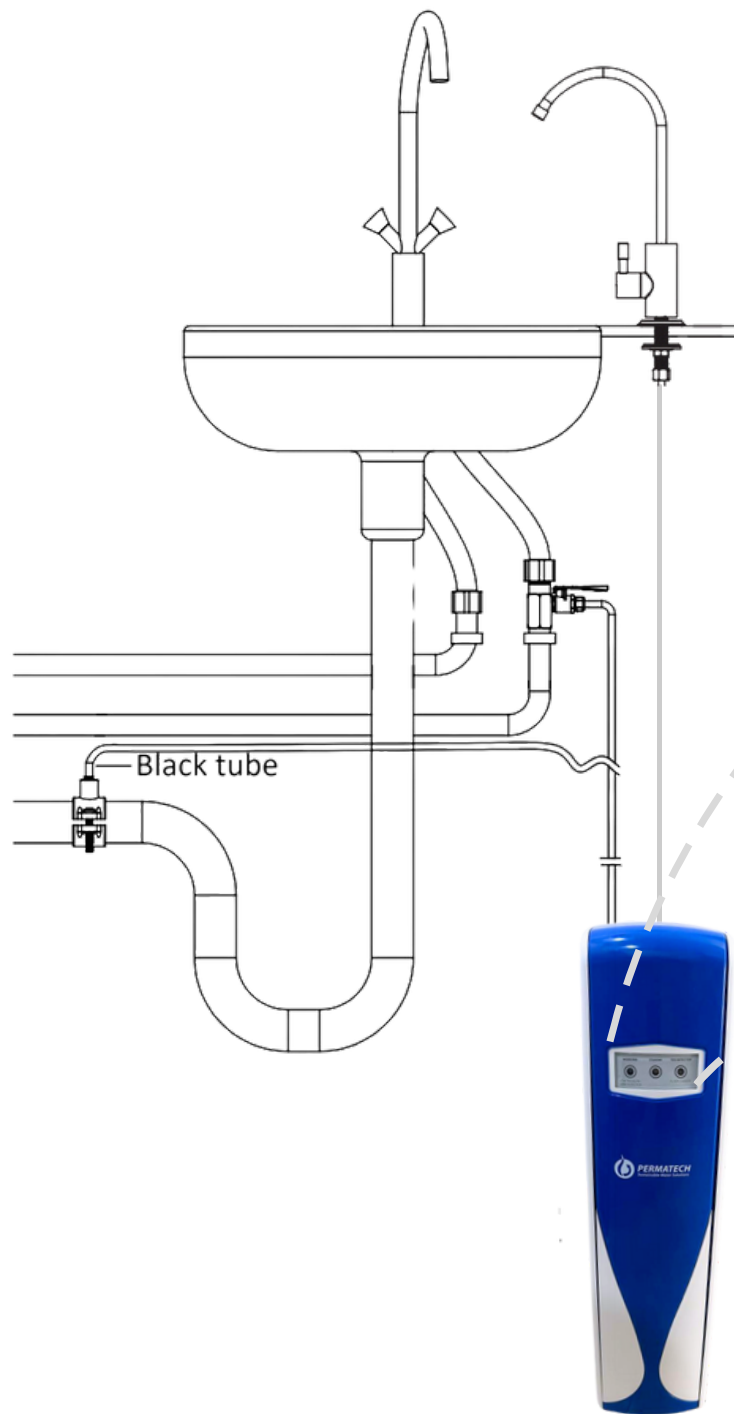

Introducing the OptimPure 60 Tankless RO System, your ultimate solution for pure, fresh water. Designed with a sleek, 10cm thin casing, this compact system not only saves space but also integrates seamlessly to meet higher output demands. The OptimPure 60 produces up to 60 liters per hour, ensuring a steady supply of high-quality water for your needs.

Featuring a convenient filter cartridge design, maintenance and replacements are a breeze. Its elegant, countertop-friendly model adds a touch of sophistication to any kitchen. With the OptimPure 60, enjoy the perfect combination of efficiency, style, and convenience in your water filtration system.

Specifications

- Model: OptimPure 60
- Voltage: 1220V
- Output: 400GPD (60LPH)
- Pressure: >30psi
- Input TDS: <1000
- Dimension: H43.5 x W10 x D43 (cm)

OptimPure 60 Tankless Water Purifier

Features

1. Low Pressure/Leak Detection

- Alerts users to any low pressure or potential leaks in the system, ensuring prompt maintenance and prevention of water damage.

2. System Working Indicator

- Provides a clear indication that the RO system is functioning correctly, giving users peace of mind.

3. Full Tank Indicator

- Notifies users when the tank is full, preventing overflow and ensuring optimal water storage management.

4. Filter Change Reminder

- Alerts users when it's time to change the filter, ensuring consistent water quality. The system will stop if the filter is not changed within 15 days after the reminder, requiring a reset to restart.

5. TDS (Total Dissolved Solids) Detection

- Monitors and indicates the TDS level of the water. Ensures the water quality is below 200 ppm for safe consumption. Alerts users if the TDS level exceeds 200 ppm, prompting necessary action.
